SUMANTH GOLLA

ENTRY-LEVEL JAVA DEVELOPER

Hyderabad | gollasumanth9@gmail.com | 9121719015 | LinkedIn

PROFESSIONAL SUMMARY

Entry-level Java Developer with hands-on experience building full-stack applications using Java, Spring Boot, Spring Data JPA, Hibernate, MySQL, Thymeleaf, HTML, CSS, and JavaScript. Built and deployed the Healthcare Management System on Render, developing backend logic to manage patients, doctors, and appointments and integrating a Groq API-powered chatbot to improve user support. Also created an AI Document Q&A Assistant that extracts PDF content, stores data in MySQL, and returns answers with supporting page references. Seeking opportunities to apply strong backend, database, and application development skills in Java-focused roles.

EDUCATION

Malla Reddy University, Hyderabad, Telangana | 2021 to 2025

B.Tech in Information Technology

• Graduated 2025

• CGPA: 7.9

• Relevant coursework: Data Structures, Object-Oriented Programming, Database Management Systems, Software Engineering, Computer Networks

Narayana Junior College, Hyderabad, Telangana | 2019 to 2021

Intermediate / Higher Secondary Education

• Score: 93%

PROJECTS

Healthcare Management System with AI

Tech Stack: Java, Spring Boot, Spring Data JPA, Hibernate, MySQL, Thymeleaf, HTML, CSS, JavaScript, Groq API

GitHub: https://github.com/sumanth8022/HealthCare_AI

• Built the backend for a full-stack healthcare platform to manage patients, doctors, and appointments in one place.

• Implemented Spring Boot services and JPA-based data access for core application flows, including user interactions, scheduling, and record handling.

• Integrated an AI-powered chatbot using the Groq API to answer user queries, suggest doctors, and summarize reports for a smarter experience.

• Deployed the application on Render and connected it to a cloud-hosted MySQL database for production use.

AI Document Q&A Assistant

Tech Stack: Java, Spring Boot, MySQL, Apache PDFBox, Groq API

• Building a Spring Boot application that lets users upload PDF documents and ask questions about their contents.

• Implementing page-by-page text extraction using Apache PDFBox.

• Designing MySQL storage for documents, extracted text, and question history.

• Developing document search to identify text relevant to each question.

• Integrating the Groq API to generate answers and display supporting page numbers.

TECHNICAL SKILLS

- Java
- Spring Boot
- Spring Data JPA
- SQL
- Thymeleaf
- HTML
- CSS
- JavaScript
- Groq API

CERTIFICATIONS

AWS Academy Cloud Foundations, AWS Academy

Introduction to HTML5, Coursera
